RT-Thermolight

Advantages

- quick and easy installation
- translucent
- heat-insulating
- high temperature resistance
- versatile designing in shape, colour and function
- good long term performance through UV protection
- 200 times tougher than glass
- shatter proof

Applications

- Roofings
- Sports and industrial buildings
- Roof constructions
- Roof lights - flat and curved
- Non airconditioned spaces
- Roof lights integrated into corrugated sheet roofing constructions
- Refurbishment

General information RT-Thermolight

The RT-Thermolight offers three polycarbonate panels that can be incorporated into a flat, trapezoidal or corrugated roofing construction to various widths. Offering high insulation values and light transmission these light weight systems are extremely weather and impact resistant.

With minimal use of alloy components all systems are quick, easy and economical to install.

Systems overview RT-Thermolight

The following table shows an overview of the RT-Thermolight systems from Rodeca. The specified span widths relate to a load pressure of 1.00 kN/m². Please inquire for project specific load information.

<p>PC 29330-XL</p> 	<p>pitched system > 5°</p> 	<p>span width 1.30m*</p>
<p>PC 2685-3</p> 	<p>pitched system > 5°</p> 	<p>span width 1.50m*</p>
<p>Thermolight 1000</p> 	<p>pitched system > 5°</p> 	<p>span width 3.00m*</p>
<p>Thermolight 1000</p> 	<p>curved application R>10.00m</p> 	<p>span width 3.00m*</p>

* Recommended span width for load pressure of 1.00kN/m² and 15° pitch.

Panels Thermolight

PC 29330-XL

Colours
clear / opal from 3t

Thickness (mm)	30
Building width (mm)	930 (+1/-1%)
Weight (kg/Lfm)	approx. 3.6

PC 2685-3

Colours
Standard: crystal Color version from 400 m²

Thickness (mm)	40/85
Building width (mm)	600 (+1/-1%)
Weight (kg/m ²)	approx. 5.20

Thermolight 1000

Colours
Standard: clear Color Version from 400 m²
Decocolor Heatbloc from 400m²

Thickness (mm)	20
Building width (mm)	1080 (+1/-1%)
Weight (kg/m ²)	approx. 2.9

All installation advice, application requirements and further technical information can be viewed in our technical product data sheets and installation manuals.

Thermolight 1000

The RT-Thermolight comprises a 20mm thick Polycarbonate Multi Wall Sheet with side integrated corrugations placed onto custom-fitted aluminium profiles. The cover width of 1000mm makes it the ideal solution for non-airconditioned spaces with usual sandwich panel roofing. Integrated ventilation windows can be installed with a recommended minimum pitch of 10°.

Customisation of side lap features

The added value of PC 29330-XL is the possibility to change dimensions of side lap features with relatively small investments (depending on ordered quantity). This way a wide variety of shapes and sizes is possible and depending on customer requirements the high corrugation can be adapted to shape of composite panel intended for use.

Overlapping of PC 29330-XL lengthwise

Due to the possibility to overlap the panels, nearly every length in roofings can be realised. A hollow section will be placed onto high corrugation and the next panel is placed onto it. The sealing must be provided from installer. Minimum overlapping shall be 300mm. For modelling of all necessary end plates provided from installer, please inquire the exact panel dimensions in advance.

Accessories

Recommended fixing
End plates (provided from installer) on top of the high corrugation and polycarbonate panel

Alternate fixing
